The DevOps Engineer will be part of the team that is responsible for designing, developing, and operating the infrastructure and applications that make Throtle's data onboarding solution work. We are looking for someone to work in a startup environment that is constantly growing and evolving. The ideal candidate can work with teammates in troubleshooting problems, identifying resolutions, and assessing situations in real time. Our team is empowered to keep our fast-paced, high volume processing environment operational for our clients and partners.

PRIMARY RESPONSIBILITIES

- Maintaining our existing infrastructure and code.
- Be involved in real-time assessment of issues and help develop solutions
- Create tools and solutions to manage and monitor our rapidly growing infrastructure and operations.
- Monitor software and systems to detect issues before they impact business operations
- Build and design solutions that mitigate risk and increase efficiencies
- Automate processes and sub-processes to enable greater scale and speed
- Take part in performance & capacity monitoring and planning

KNOWLEDGE AND SKILL REQUIREMENTS

- BS/BA degree in Computer Science, Information Systems or related field
- Have 2-3 years of DevOps-like work or experience in a real time operational processing environment
- Experience in Linux SysAdmin
- Have proficiency in multiple coding/scripting languages- Java, Perl, Bash, SQL.
- Working knowledge of networking: TCP/IP, ICMP, SSH, LDAP, DNS
- Experience with data flow and queue management using tools like Kafka and Flume

- Working knowledge of storage systems and formats
- Ability to identify problems, and effectively communicate solutions to peers and management

OTHER VALUABLE SKILLS

- Experience with AWS and EC2 instances
- Experience with configuration management and automation tools like Chef or Puppet.
- Experience with a RDBMS – PostgreSQL, Oracle, or Microsoft SQL Server.
- Exposure to NoSQL/Big Data: Hadoop, HBase, Cassandra, MongoDB

Throtle

WE HIRE AND DEVELOP GREAT PEOPLE

Throtle is growing and growing fast. We are on a mission to build the best onboarding platform for our clients while building an awesome company.

We hire and develop great people, which means that each and every one of our employees is not only talented, they genuinely care about the success of our customers and stand behind our company.
